Hit a couple different lakes this week.

Monday, the lake I fished was extra murky, water temps were in the mid 60's. The bite was much slower than I hoped but I did manage to get six bass and two of those were close to 5 lbs. All these fish came shallow 1' or less.

Today, a different lake which was surprisingly clearer than normal. The water temps were around 60. A lot more action today, catching fish both shallow and deep maybe 20 total. I had 2 that were just under 3 lbs and the rest were 1 - 2 lbs.

Anyone else been out?
